

## SUMMARY

This book is a manual for caring for your ‘girls’ and ‘boys’ if you wish to nurture them to build up enough magnetic strength to create a Perpetual Motion Holder (PMH).

**GIRL** - is a curved magnet. A U-shaped magnet. Ed refers to a ‘girl’ as being ‘Sweet’ if she has not been ‘soiled’. A ‘girl’ becomes ‘soiled’ if she connects or gets too close to a ‘boy’ magnet who is not intended to be the ‘girls’ permanent partner. Ed even goes on to say it's not your fault if a brand new ‘girl’ is soiled from the factory, as he blames the factory for letting the ‘girls’ be too close to ‘Fresh boys’. Once a girl has been impressed by a boy, she stays impressed because “first impressions last”. A Girl is the strongest at “...Between sixteen – sev-enteen years old”. Xx Years old referring to the strength of the ‘girl’s charge.

**BOY** – is a straight magnet. A ‘Fresh’ boy is a straight magnet who has not been in contact with another magnet. A boy becomes very ‘Fresh’ (Strong) at sixteen years old. Sixteen years old refers to the charge/strength of the boy magnet. At this ‘age’ the ‘Fresh boy’ is strong enough to soil a ‘girl’ magnet by simply being in the same room.

**MAN** – is a fully matured boy magnet. A Girl magnet will be soiled by any ‘boy’/ ‘Fresh boy’ magnet. A Magnet must be a Man to be useful to a Girl in creating a PMH and the two must forever onwards be considered Permanent Partners.

**MAMMA / MOTHERS** – That’s YOU. YOU are MAMMA. YOU are nurturing the ‘girls’ and ‘boys’ strength (charge) in the ‘nursery’(room where you are nurturing them). Once the girl reaches Sixteen-Sev-enteen and has not been ‘soiled’ then she is ready. Once the boy reaches Sixteen you must get him out of the nursery because he has just begun developing his charge.

**FATHERS** – The Companies producing the magnets

**MONEY** – Refers to Charge / Strength of the male magnet. A boy ‘makes money’ for his girl until he gets enough ‘money’ to ‘get the girl’.

**SWEET SIXTEEN** – A Girl magnet at full strength, who has not been close enough to a male magnet to become ‘soiled’ / impressioned and who has not been left alone long enough to become ‘red faced’ (Left too long, maybe red-faced refers to the red tip on a compass and the fact that the girl can manipulate the compass). Sweet Sixteen is a young girl magnet that is ‘Sweet’, fully charged and ready to be used in a PMH.

I hope you enjoy my decoding

## AUTHOR'S PREFACE

Reader, if for any reason you do not like the things I say in this little book, I left just as much space as I used, so you can write your own opinion opposite it and see if you can do better.

### The Author

This paragraph led me to believe the whole book was written from a different Point Of View.

Here is where the first clue lies. “The Author”. Everywhere else in the book it has Ed’s name. By Edward Leedskalnin, Published by Edward Leedskalnin as can be seen on the following page. Then why is this paragraph signed off with ‘The Author’? Ed is writing from different points of view. The Author is a Male Magnet! The ‘person’ telling the story is a Male Magnet who “Didn’t get the girl”. The first paragraph of the book on Page 1 has The Author talking about ‘Eds Place’. If Ed was writing the book from his own Point Of View he would have written ‘My Place’.

The empty pages were left so you can do what I’m doing now, decode it.

The Author is a ‘Fresh Boy’ / ‘Failed Magnet’ who didn’t ‘Get the girl’ because he didn’t have enough Money (charge) and couldn’t make enough Money (charge).

## Ed's Sweet Sixteen

To those more than fifteen thousand people who have seen Ed's Place, I told about Ed's Sweet Sixteen. Now, I will tell you why I did not get the girl.

In Ed's Place, there was a lasting fame for a girl's name but it would have taken money to put the fame upon her. The trouble was that I did not have the money and didn't make enough. That was the reason I could not look for a girl.

As I said before, the first point of view is written from the point of view of a 'failed magnet' or a 'failed fresh boy'. *"Now, I will tell you why I did not get the girl."* This 'failed magnet' did not 'get the girl' because *"I did not have the money and didn't make enough"*. The 'failed boy' did not have enough charge and didn't make enough charge to be able to 'get the girl'. The charge of a 'Fresh Boy' has to be made over time. My belief is 'getting the girl' refers to the magnet being selected to be coupled with Ed's Sweet Sixteen to create a PMH (Perpetual Motion Holder). The girl, as you will see later in the book is a curved 'smiling shaped' magnet. The boy is a straight magnet. The girl and the boy come together to make a Perpetual Motion Holder (PMH). But it must be a 'fresh boy' and an 'unsoiled girl' for the PMH to work. The Fresh boy is a straight magnet which has not been used with another girl (hence, 'Fresh'boy).

Now, I am going to tell you what I mean when I say "Ed's Sweet Sixteen". I don't mean a sixteen year old girl, I mean a brand new one.

Not a 'girl' (remember, girl = curved magnet) which is old and used, but a brand new one (not 'soiled' by other Fresh Boys)

If it had meant a sixteen year old girl, it would have meant at the same time, that I made money for the sweet sixteen while she was making love with a fresh boy.

Making money refers to the magnet making charge. If it had meant an old, used 'girl', then the magnet would be making charge (magnet's charge must be created over time, as you will see later in the book) while the girl 'made love' with a 'fresh boy'. Making love is the connection between the 'girl' and 'boy' magnets.

I will furnish all the love making to my girl. She will never have to seek any from anybody else, for I believe that there

is not a boy or man in this world good enough to be around my girl and I believe that the other men also ought to have enough self-respect so that they would think that I am not good enough to be around theirs.

Once the 'Fresh Boy' and the 'girl' are connected (love making) the boy can never be used on another 'girl'. The PMH would not work as this 'Fresh boy' is "not good enough to be around theirs". Remember this whole passage of the book so far is written from the perspective of this 'Fresh boy'

Anything that we do leaves its effect, but it leaves more effect upon a girl than it does upon a boy or a man,

The 'girl' is affected more than a 'boy'. Boy or Fresh Boy is a newly created stright magnet. A Man is an older, straight magnet, basically a Fresh Boy ages into a Man

because the girl's body, mind and all her constitution is more tender and so it leaves more impressions -- and why should one want to be around any-body's else impressions?

Self explanatory. The "girl's" impressions come from a 'boy'. Other 'boys' do not want to be around a 'girl' which has already been impressed by another boy.

A girl is to a fellow the best thing in this world, but to have the best one second hand, it is humiliating.

A second hand 'girl' just won't work. The boy and the girl must be Fresh / brand new and made for each other.

All girls below sixteen should be brand new.

'girls below sixteen' is a girl you want to use in your PMH.

If a girl below sixteen cannot be called brand new any more, it is not the girl's fault; the mamma is to blame! It is the mamma's duty to supervise the girl to keep those fresh boys away.

Here is a warning from Ed. You are the mamma. You are creating the girls and the boys (as you will see later). You are making these magnets and building up their charges. You must supervise the 'boys' and 'girls' and keep them apart. If the 'girl' is 'not brand new' then you are to blame because you allowed the 'boys' to be close enough to interact with the 'girls'

In case the girl's mamma (That's you) thinks that there is a boy somewhere who needs exper-

ience, then she, herself, could pose as an experimental station for that fresh boy to practice on and so save the girl.

You can use yourself as an experimental station for a 'fresh boy' to practice on. You are the girl's mamma. By doing this you give the Fresh Boy experience. Also you don't have to use trial and error to see if a 'Fresh boy' is good enough for your 'girl below sixteen'. If you used trial and error you can 'soil' the 'girl'. You are saving the girl by doing this.

Nothing can hurt her any more. (Nothing can hurt YOU anymore. Remember the start of this paragraph started with 'girl's mamma') She (You) has already gone through all the experience that can be gone through and so in her case (Your case), it would be all right.

You are already charged. The 'Fresh Boy' won't do you any harm.

But all the blame does not rest on the mamma alone.

Another warning from Ed. You (the mamma) are not to blame if the girl is soiled.

The schools and the churches are cheapening the girls!

The companies making the 'girls' and cheapening them!

They are arranging picnics --- are coupling up the girls with the fresh boys -- - and then they send them out to the woods, parks, beaches and other places so that they can practice in first degree love making.

The 'girls' are coupling up with 'Fresh boys' at the factory or in transit. The 'girls' from the factory have already been cheapened/ soiled. If you buy a girl it may be no use to you in creating a PMH

Now, I will tell you what the first de-gree love making is. The first degree love making is when the fresh boy begins to soil the girl by patting, rubbing and squeezing her.

First degree love making is when a curved 'girl' magnet has been 'soiled' by a 'Fresh boy' straight magnet. If a boy and girl magnet touch, the girl will be no use in creating a PMH. She will already be impressioned by that 'boy' magnet

They start it in that way but soon it begins to get dull and there is no kick in it, so they have to start in on the second de-gree and keep on and then by and by, when

the right man Notice the word "Man" comes along and when he touches the girl, then he touches her like dead flesh. The girl's charge is gone. There is no

more response in it because all the response has been worked out with those fresh boys. Those 'Fresh boy' magnets 'soiled' the 'girl' magnet and have worked the charge out of her. Why should it be that way?

Everything we do should be for some good purpose but as everybody knows there is nothing good that can come to a girl from a fresh boy.

Suggesting the Fresh Boy must be a Man before being used in a PMH. A Man is a fully charged 'boy' who has matured (reached sufficient charge to be coupled with a 'girl to create a PMH). When a girl is sixteen or sev-enteen years old, she is as good as she ever will be, but when a boy is sixteen years old, he is then fresher than in all his stages of development. He is then not big enough to work but he is too big to be kept in a nursery and then to allow such a fresh thing to soil a girl 'xx years old' refers to the amount of charge a magnet has. The 'boy' has a stronger charge than a 'girl' When the 'boy' straight magnet reaches sixteen he must be kept out of the 'nursery' otherwise he will be so strong he will be so 'fresh' that he will soil every girl in the 'nursery' (Magnet creating room) --- it could not work on my girl. Now I will tell you about soiling. Anything that is done, if it is with the right party it is all right, but when it is with the wrong party, it is soiling, and concerning those fresh boys with the girls, it is wrong every time.

All 'Fresh boy' magnets will soil a 'girl' magnet. A magnet must be a man before being connected (love making) with a 'girl' magnet.

4

Now, how can you find out if I am right? Pick out any girl you want but do it before she has anything to do with any-body---as soon as she begins to couple her-self with somebody. You watch her every day and some day you will see the girl coming home with a red face. One's face is a window for other people to look in on and when it turns red it shows that there was something done that her moral conscience told her should not have been done.

Ed has given you an experiment to try. Pick out a girl than has not been soiled and watch her, without coupling her. Remember a girl is a curved magnet. "One face" of the magnet is the 'window' to watch. If one face of the 'girl' turns red (referencing the 'red tip' on a compass), she is soiled. See page 6 of this book. A girl will 'mis-represent' herself if left alone too long.

It is shocking to imagine that someone else produced that red face to my girl. (Remember, this chapter is written from the perspective of a 'Fresh

boy') In such a case she could not be one hundred per cent sweet. She is 'soiled'. As soon as a girl acquires experience the sweetness begins to leave her right away. As soon as a curved magnet acquired 'magnetic experience' from a Fresh Boy (immature magnet), she is no longer sweet and cannot be used in your PMH. The first experience in everything is the most impressive. It should be reserved for the permanent partner The first touch the girl magnet received from a male magnet should be only from a magnet which will be the only magnet used to create the connection in the PMH---the less of the new experience is left, the cheaper the affair will be.

That is the reason why I want a girl the way Mother nature puts her out.

The male magnet writing this chapter wants / needs his 'girl' magnet to be pure "The way Mother nature put her out". The way she was originally created.

This

5

means before anybody has had any chance to be around her and before she begins to misrepresent herself. I want to pick out the girl while she is guided by the instinct alone.

A girl will 'mis-represent' herself when she becomes 'red-faced'. She will be no good to be in your PMH.

When I started out in doing things that would make it possible for me to get a girl, I set a rule in my behavior to follow:

The sweet sixteen had to be a beginner and a likeable girl and with a mild disposition; The 'Sweet Sixteen' (Girl magnet at full strength) has to be a beginner at love-making (coupling). I had to be deserving of her. I (The magnet writing this chapter) must have enough charge / strength to be useful in creating a PMH. Everybody's sweet sixteen should be so high in one's estimation that no temptation could induce one to act behind her back. Don't let your 'boys' touch another girl magnet before becoming a permanent partner with the magnet's first Love-Making(coupling). I always have wanted a girl but I never had one.

Poor male magnet has never had a girl...yet ☺ Remember page 1. He doesn't have enough money (charge) or make enough money (charge) ☹

The reason why is that I knew it would produce several conditions and leave their effects, but I did not want any effects from past experience left on me and my sweet sixteen.

Whenever two magnets get close enough to impress themselves on the other they leave their effects on each other.

A girl will economize, go hungry and endure other hardships before she will put on another girl's dress to wear. A girl magnet cannot be changed to be the same as another girl. I will put

6

gunny sacks on before I will wear another man's clothes, The male magnet writing this chapter cannot become the same as a different male magnet and this is only a step from having another fellow's girl or another girl's fellow.

Having such a case the present possessor would have to clean up the past performer's effects. Now you see, to clean up the other person's leavings, it is humiliating, Humiliating? Or downright impossible to clean up the impressions left from another magnet so it would be a cheap and undesirable affair. I want one hundred per cent good or none. That is why I was so successful in resisting the natural urge for love making.

The male magnet writing this chapter has resisted coupling with another magnet so he can be 100 per cent good for his girl.

Now about sweet and how sweet, a girl can be one hundred per cent sweet to one only and no more. A girl can be sweet to only one male magnet. To illustrate, suppose we are two men Two mature, full strength, straight male magnets and a girl curved magnet together somewhere and some one else would ask if she is sweet and we both would say she is sweet. She is sweet because she hasn't been touched or coupled. But let her act very friendly with the other fellow and then if someone should ask if she is sweet, I would say that she is not. She is not sweet from the perspective of the male magnet writing this chapter. She is only sweet for the other male magnet who just acted 'very friendly' with her. Now you see her friendly action with the other fellow produced a change in me and it would

7

produce a change in any other normal man.

We always strive for perfection. We are only one-half of a perfect whole, man is the bigger and stronger half and the woman is the other. Man magnets are stronger than girl magnets. To be perfect there must be two, but where there is two there is no room for more, so the third party is left to go

somewhere else with sour feelings. **There is no room for a third magnet. The other male magnet must find another Sweet Sixteen to couple to.**

A normal male is always ready to strive for perfection, the female is not. **The female magnet is not always ready to be coupled, even if she is 'Sweet' whereas the male magnet is always ready.** It is not only with human beings, it is the same with every living thing. If you watch a flock of chickens, where there is a rooster, and if you add another rooster, you will see them fight to death. One will have to go or be killed and this is the same thing with the other living things. **Ed describes the similarities between living beings and magnets**

Lower forms of life are guided by instincts alone so the present only comes into consideration. As soon as the other male is chased away, the female is as good as she ever was, but with us it is different. We are guided more by reason and thought than

8

by instinct and so the present, past and future come into consideration. Now, if it is not good today, it was not good yesterday and it won't be good tomorrow. **If the magnets are not a good match today, they never will be and never have been.** That is why an experienced girl cannot be one hundred per cent sweet. **A girl magnet which has been impressed by a male magnet previously cannot be considered 100% Sweet.**

According to my observation the girls are wrong in looking for their permanent partners. They are too quick. **The girls build up their charge quickly when compared to a male magnet who started in the 'Nursery' at the same time. The male magnet takes longer to build up. So you need to start nurturing the male magnet before the female magnet starts nurturing or is even created.** By being too quick, they only get those fellows with quick emotions. All quick emotions are irresponsible and short lasting.

There are two kinds of love - sensual and sentimental. Sensual love has the present and little future only. The sentimental love has the present, past and future, so it is more desirable. It will be slower but it will last longer. **Slower to build up enough charge to last in the PMH.** Now, girls, when any fellow jumps quickly at you, you had better keep away from him. He has no consideration that the action would do any good to you. You are the weakest side, so you

should have the better deal and if you don't get the better deal, there is a little brute in him and it may come very hard to train it out of him. **It will be very hard to train the 'brute' / impression of the female out of the male magnet.**

The fellow who makes an advance toward you, and if he won't state what the eventual purpose will be, he is not a gentleman. All men should know that the girl's primary purpose is to find a permanent partner while they are young.

Those fellows who fail to see this are not desirable to have around.

**Permanent Partners only. All girls are trying to find a permanent partner. All males are simply trying to impress as many females as they can. Not all males will be useful. Get rid of the males that aren't useful (Like the male magnet writing this chapter)**

Girls below sixteen **Referring to the 'sweet' charge** should not be allowed to associate with the boys, **Keep the girls away from the boys** they are practicing in love making **Coupling**, such a thing should be discouraged.

Love making should be reserved for their permanent partners. **Do not couple magnets unless its with the partner they will stay with forever.** With every love making affair, their hearts get bruised and by the time they grow up, their hearts are so badly bruised that they are no more good. **Ed is simply humanising the magnets.**

Boys and girls start out as friends and finish as disappointed lovers, now let me tell you. Male and female are never friends, a

friend will not want anything from a friend, but a boy or a girl, one or the other, sooner or later, will ask for a little kiss, so they are not friends, they are lovers. **Magnets can never be friends, only permanent partners.**

Let's see what happens when they are selecting their partners while they are young. They select their partners on account of good looks. The liking for the good looks remain but the good looks change and they change so much in ten years that you would not recognize them if you had not seen them now and then - and the boy gets the best deal almost every time **The boys get stronger.** By that time they are grown up. The girls will be faded **Lose their charge/ get weaker** so much that the fellow would not want her any more so then, any girl who associates with a fellow only five years older **Male charge**

must be more than 5 years older (years older referring to charge) is headed for a bad disappointment. This all could be avoided with the right kind of an education. If YOU are educated enough, you can avoid incorrect coupling of magnets.

Now, a few words about education. You know we receive an education in the schools from books. All those books that

11

people became educated from twenty-five years ago, are wrong now, and those that are good now, will be wrong again twenty-five years from now. So if they are wrong then, they are also wrong now, and the one who is educated from the wrong books is not educated, he is misled. All books that are written are wrong, the one who is not educated cannot write a book and the one who is educated, is not really educated but he is misled and the one who is misled cannot write a book which is correct. Ed is saying the current knowledge about magnets is incorrect and hence, people have been misled. The rest of this page and the next are just Ed saying the text books are wrong and therefore our understanding is incorrect. And people who are misled will only write books that are incorrect.

The misleading began when our far distant ancestors began to teach their descendants. You know they knew nothing but they passed their knowledge of nothing to the coming generations and it went so innocently that nobody noticed it. That is why we are not educated.

Now I will tell you what education is according to my reasoning. An educated person is one whose senses are refined. We are born as brutes, we remain and die as the

12

same if we do not become polished. Some are too coarse to take it. The main base of education is one's "self-respect". Any one lacking self-respect (Common-sense) cannot be educated. The main bases of self-respect (Common-sense) is the willingness to learn, to do only the things that are good and right, to believe only in the things that can be proved, to possess appreciation and self control.

Now, if you lack willingness to learn, you will remain as a brute and if you do things that are not good and right, you will be a low person, and if you believe in things that cannot be proved, any feeble minded person can lead

you, and if you lack appreciation, it takes away the incentive for good doing and if you lack self control you will never know the limit.

So all those lacking these characteristics in their makeup are not educated.

13

### Domestic

The foundation of our physical and mental behaviour is laid while we are in infancy, so the responsibility of our shortcomings rest upon our mothers (YOU) and fathers (companies making the magnets), but mainly upon our mothers. (Mainly YOU)

Today, I myself would be better than I am if my mother(The person who nurtured this poor male magnet, possible Ed ☺) and father (The company who created the male magnet writing this book)had known how to raise me and the same is true for almost everybody else. The same is true for all other magnets.

At the first contraction in any part of your body, you will never notice any mark, but keep it up and some day you will see a crease(wrinkle), and it will be permanent.Permanent wrinkles from say, bending your arm or frowning. We all want to look and act the best that we know how, but we cannot learn from ourselves so we have to learn from others. The magnets have to learn from other magnets?

In my thirty years of studying conditions and their effects I have come to the conclusion that I can tell pointers to the people that would be a good help to them. That is why I wrote this little book. Ed studied magnets for 30 years and wrote this book to tell people pointers.

14

To accomplish good results, the mothers(That's YOU) will have to keep good watch on their darlings until they acquire the natural ambition to shine(Power a light bulb), and the girls should be more carefully watched than the boys, because the girl's looks are her best asset and should be cultivated. Girls are more sensitive than boys.

Don't raise the girls too big by over feeding them and too curved by neglect. Referring to the charge /strenght of the girl magnets. Remember 'Sweet Sixteen' is the perfect charge and means she is not 'soiled'. People who want to shine (People who want to have magnets powerful enough the power a light bulb) will always have to restrain themselves(take

your time and don't rush things), because if they don't, their actions won't be graceful. Even when one's looks are good, if he abandons restraint, the performance won't be good. **The performance of the PMH/ magnets won't be as good as it could be.** It is more likely that the person himself won't notice but others will. The first thing I notice about other people is, if there is something wrong and if it could be improved and the same must be true about other people noticing my defects and neglects. To correct those neglects, somebody will have to point them out, but to do it directly will not do, because

15

they would think you are mean. That is why I want to point out the defects and neglects in this book.

**Ed wants to point out the defects and neglects of creating good 'girls' and 'boys' so someone else doesn't have to put a dampener on your discovery.**

The most striking neglect that comes to my attention is when one is smiling. A smile is always pleasing if it is regulated but without restraint, it is not. When smiling, the teeth only should be shown. **This is the important information here. "The teeth only should be shown".** The rest of this page and the next is just 'filling' to take your eyes off the prize. Imagine a U-shaped "female" magnet. It is the shape of a smile. Only show the ends. You must insulate the 'gums'. This means only show the ends of the U-magnet and cover up the rest. As soon as you show the gums, it spoils the good effect. **Not insulating the 'gums' spoils the effect of the magnets. Probably be good to insulate the male magnets as well.** When showing the gums you are doing triple harm. First, the gums never look good; second, you are making too big creases in the side of your mouth and third, your lips come too wide apart. Especially should a girl be careful not to show too abnormally big mouth. **The warning seems to focus Especiall for the girls.** Girls should do nothing that would impair their best looks. I have seen moving picture stars, public singers and others with their mouths open so wide that you would think the person lacks refinement, but if they knew how bad it looks they would train it out. No doubt they have practiced before

16

a looking glass, but a looking glass does not show such an enormous opening, because while they are looking at the looking glass they are under restraint

and so they really don't know how it looks while they are not watching themselves. In a looking glass you will never notice all your neglects and defects. They have to be pointed out by somebody else.

It is painful to hear other people pointing out our neglects and defects so do not entrust your friends to do it. Your friends may not always be your friends. The best way is to leave that to your own family. Your mother and father will do nothing to embarrass you. Your mother will do it better and it should be started while one is still a baby.

The first thing the mothers should do is to watch the baby's mouth so it is not hanging open. The mouth, by hanging open, stretches the upper lip and when kept open while growing, then when fully grown,

17

the lips will not fit together any more.

Mothers (**That's YOU**) should keep close watch on their children's behaviour. As soon as they notice some action and contraction that is not graceful, they should correct it immediately, (**Referring to the bending of magnets?**) because their actions leave their effects. To small children, it doesn't matter how ugly they look, but when they are grown up, the good looks will be the best thing, and one with a disfigured face cannot be satisfied with oneself. The foundation for one's best looks will have to be laid while one is small. **Nuture your male and females while they are small.**

A graceful smile is pleasing but if it is not perfect, its pleasing effect is marred. To obtain better results, don't make the smile too big by opening the mouth too wide, drawing the lips over the gums, or drawing one side of the lip more than the other, or drawing both lips to one side and have them twisted. **Magnets should be perfectly shaped.**

Children should not be encouraged to smile too much, smiling in due time will

18

produce creases in the sides of their mouths. It would be better to save the smiles till they are grown up. Children while they are growing should be watched, closely. They are stretching their mouths with their fingers and are jamming too big objects in their mouths and making ugly faces. All these actions should be forbidden for their future's sake.

Eyes should be trained to look in the middle between both lids, never through the forehead. If this is done, it will produce creases in the forehead. When the lids of one eye are more narrow than the other it should be trained out and equalized.

In case one leg is shorter and one shoulder lower, they can be disguised so that other people would not notice it. In walking the toes should be carried a little out, by carrying the toes out one can walk better. Shorter steps would make the walking more graceful and those who stoop over, higher

19

heels would help to keep the body more erect.

Girls should take smaller steps than boys. By taking smaller steps the body would not jump as much up and down or swing from side to side.

Mothers (YOU) should study the other people's children(Ed's magnets?) and then pick out the best model from which to train their own child.

Everybody should be trained not to go out anywhere before somebody else has examined them to see if everything is all right. It would save many people from unexpected embarrassment.

20

### **Political**

Before I say anything about the government, let's establish a base for reasoning. All our ideas should produce good and lasting results and then anything that is good now would have been good in the past and it will be good in the future and it will be good under any circumstances, so any idea that does not cover all this broad base is no good.

Back to the notion mentioned previously, that if a magnet is not good now, it never will be and has never been good. Referring to the creation of the magnet, to the delivery, to the now.

To be right, one's thought will have to be based on natural facts, for really, Mother Nature only can what is right and what is wrong and the way that things should be.

My definition of right is that right is anything in nature that exists without artificial modification and all the others are wrong.

Now suppose you would say it is wrong. In that case, I would say you are wrong yourself because you came into this world through natural circumstances that you had nothing to do with and so long as such

a thing exists as yourself, I am right and you are wrong. Only those are right whose thoughts are based on natural facts and inclinations.

It is natural tendency for all living things to take it easy. You watch any living thing you want to, and you will see that as soon as they fill up, they will lie down and take it easy.

**As soon as a magnet is fully charge, they will be content and 'take it easy' by not building any more charge.**

The physical comfort, the ease, that is the only thing in this world that satisfies. It cannot be overdone and it is the real base of all our actions. We all cannot take things easy because there is too much competition from other people only those who possess good management will succeed by exploiting domestic animals, machinery, other people and natural resources.

Everything will have to be produced that is consumed and to those who have to produce the things themselves, they are consuming the easy days are not coming to them.

It has been told to you that the government is for the purpose of protecting "life" and property, but it really is to protect "property" and life. Nobody wants your life but everybody wants your property.

In International dealings, when an army conquers the land, they don't want the people, they want the physical property and so do the thieves and the bandits. They want your money and property and if you will submit peacefully, they won't harm you.

Now you see, nobody wants you, they want your property so really the property is the one that needs the protection and not you. You are the protector yourself.

Government to be lasting will have to be just. This means it will have to protect all the property alike and all the property will have to pay equal taxes, which means big property, big taxes, and small property, small taxes. Government cannot exist without taxes so only those who pay taxes

should vote and vote according to the taxes they pay.

It is not sound to allow the weaklings to vote. Any one who is too weak to make his own living is not strong enough to vote, because their weak influence weakens the state and a degenerated state cannot exist very long, but every state should be sound and lasting.

By voting, the voters dictate the state's destiny for times to come and then to allow such a weak influence to guide the state, it is not wise and so you see one should vote according to how he is carrying the State's burden.

Another unwise thing about equal voting is that it gives the loafers and weaklings the power to take the property away from producers and stronger people, and then another unjust thing about equal voting is that it gives the loafers and weaklings the power to demand an easy life from the producers and leaders.

24

Self respecting producers will not stand such an injustice for long. It is not the producers' fault when one is too weak to make his own living. The producer's life is just as sweet as the weaklings and loafers life is to them. All people are independent so you see everybody will have to take care of themselves and if they cannot, they should perish and the sooner they perish the better it will be.

To be lasting, the government should be built in the same way as the Supreme power of the land "the army." Governments have been rising and falling but the army always remains. You know there is no equality in army and so there can be no equality in the state if you are not equal producer you cannot be an equal consumer.

Fifty per cent of the people don't want to lead, they want to follow. They want somebody else to furnish the money for their living expenses and as long as such a condition exists, they are not equal with their

25

leaders. That is the reason why everybody should be put in the right place according to their physical and mental ability.

There is only one way to share the National income. It is by sharing the production and if you are not producing equally you cannot share equally. Nobody is producing anything for the others. They are producing only for themselves.

People are individuals. For instance, if you want an excitement you have to test the thrill yourself, or if you have a pain you will have to bear it yourself, or if you want to eat you will have to eat for yourself. Nobody can eat for you and so it is that if you want the things to eat you will have to produce them yourself and if you are too weak, too lazy, lack machinery and good management to produce them, you should perish and that is all there is to it.
